PROFESSIONAL SUMMARY

I'm a **Master of Computer Science** graduate who genuinely enjoys building things that work — clean **RESTful APIs**, secure backends, and interfaces people actually like using. Over the past year I've shipped real production-grade projects with **Spring Boot 3**, **Microservices**, **Spring Cloud**, **JWT Authentication**, **React.js**, and **MySQL** — not just studied them. I care about writing code that's readable, scalable, and maintainable. I learn fast, ask good questions, and I'm looking for a **Java Full Stack / Backend Developer** role where I can contribute from day one and keep growing.

TECHNICAL SKILLS

Languages: Java, Core Java, Java 8, C, SQL, JavaScript, HTML5, CSS3

Frameworks: Spring Boot 3, Spring Security, Spring Cloud (Gateway, Eureka), Spring Data JPA, Hibernate, React.js, Vite, Axios, Context API, Tailwind CSS

Backend & APIs: RESTful API Design, Microservices Architecture, JWT Authentication, API Gateway, Service Discovery, Maven
Databases & Tools: MySQL, PostgreSQL | Git, GitHub, Postman, Docker (Basics), AWS Cloud Foundations (Certified), IntelliJ IDEA, Jira

Core Concepts: OOPs, Data Structures & Algorithms, SDLC, Agile Methodology, Debugging, Problem Solving

PROJECTS

EduManage – Enterprise Institute Management System | Java 17 | Spring Boot 3 | React.js | Microservices | MySQL | JWT
2026

- Architected a distributed **microservices ecosystem with 7+ services** (Auth, Admin, Batch, Attendance, Task, Gateway, Discovery) using **Spring Boot 3** and **Spring Cloud (Eureka + Gateway)** for high availability, modularity, and seamless horizontal scaling.
- Implemented **JWT-based stateless authentication** and **Role-Based Access Control (RBAC)** across all microservices for 3 user roles (Admin, Trainer, Student); resolved cross-service 403 errors by correctly mapping JWT claims to **GrantedAuthority** in **Spring Security**.
- Built a Bulk Attendance Management module using batch processing logic, reducing trainer attendance recording time by **70%**; engineered a responsive **React.js + Tailwind CSS** frontend with Context API and React Router for seamless UX across mobile and desktop.

Being Rider – Travel & Tour Web Application | HTML5 | CSS3 | JavaScript | Git | Netlify
2023

- Designed and built a mobile-first, fully responsive travel website for bike enthusiasts, with curated tour packages and destination guides — focused on making the **user experience** smooth across all screen sizes using **HTML5**, **CSS3**, and **JavaScript**.
- Collaborated using **Git** branching strategies for clean parallel development and deployed to **Netlify** with continuous deployment — taking the project from local to live.

EDUCATION

Master of Computer Science (MCS) | Modern College of Arts, Science and Commerce, Pune
2024 – Pursuing

- Year 1 (Sem 1 & 2): **78%**
- Year 2 Sem 3: **76.9%**

Bachelor of Computer Science (BCS) | Padmashri Vikhe Patil College, Pravaranagar
2021 – 2024

- CGPA: **8.60**

CERTIFICATIONS & ADDITIONAL INFORMATION

- AWS Academy Graduate – Cloud Foundations** | Amazon Web Services | Oct 2025 | credly.com/go/cDzjVV2d (20 hrs — EC2, S3, IAM & cloud architecture fundamentals)
